

European Road Safety Charter

Call for Good Practices - to enter the selection for the:

Excellence in Road Safety Awards 2017

Deadline to submit nominations: March 31st, 2017

Submit to charter@paueducation.com

SECTION 1: INFORMATION ABOUT YOUR ORGANIZATION

	Please fill in here	Instructions										
Name of the organization	OBSERVATORIO CRIMINOLÓGICO DE LA SEGURIDAD VIAL											
Type of organization	<table border="1"> <tr> <td>SME</td> <td><input type="checkbox"/></td> </tr> <tr> <td>Large business</td> <td><input type="checkbox"/></td> </tr> <tr> <td>Association</td> <td><input checked="" type="checkbox"/></td> </tr> <tr> <td>Education/Research institution</td> <td><input type="checkbox"/></td> </tr> <tr> <td>Local/regional authority</td> <td><input type="checkbox"/></td> </tr> </table>	SME	<input type="checkbox"/>	Large business	<input type="checkbox"/>	Association	<input checked="" type="checkbox"/>	Education/Research institution	<input type="checkbox"/>	Local/regional authority	<input type="checkbox"/>	Please tick one box
SME	<input type="checkbox"/>											
Large business	<input type="checkbox"/>											
Association	<input checked="" type="checkbox"/>											
Education/Research institution	<input type="checkbox"/>											
Local/regional authority	<input type="checkbox"/>											
Organization main activity	Promoting the road security throught the road Criminology	Activity field										
Country	SPAIN	Country of the organization										
Website	http://observatoriocrimvial.com/	Organization website										
Contact person	José Maria González González	For the follow-up of the application										
Contact person's position	Director of the Observatorio Criminológico de la Seguridad Vial											
Contact person's email address	director@observatoriocrimvial.com											
Contact person's phone number	<ul style="list-style-type: none"> 687328226 											

Partners in the initiative		Your main partners in delivering the road safety activity
----------------------------	--	---

SECTION 2: DESCRIPTION OF THE INITIATIVE

	Please fill in here	Instructions
Date of start and end of the initiative	01/01/2017 to 31/12/2017	The initiative can be new or the continuity of already existing activities. It can have ended recently or be still in process.
Departments/persons involved internally	<ul style="list-style-type: none"> - Investigation - Academic training - Criminology office <p>Appart from that, there are two professionals in the Criminology, who are Juan Antonio Carreras Espallardo and Laura Gómez García.</p>	In the case of persons, indicate their positions.
Geographical scope of the activities	All the activities are carried out in Spain.	Indicate where the activities were implemented.
Summary of the initiative	The Observatory pretends to address not only the study but also the investigation of, on the one hand, the antisocial drivers and/or delinquents in the rolled traffic and on the other hand, the study of the road vctims, in order to be able to implement real measurements of prevention (so much primary, secondary, tertiary and/or situational) with the application of the criminological science and victimology. Understood the Road Criminology as ‘ a criminological discipline directed to the study of the	Describe the initiative indicating the subject, its aims and the main activities it involves. Max: 100 words

	prevention of the crimes against the road safety and to the solution of any conflict that arises after the road catastrophe; acting on the criminal behaviors or turned away inside the routes, to the restitution of the victim to its original state; emphasizing the forms of social control, so much to form and to report and to the social reaction that they cause the road catastrophes.	
Innovative character	Thanks to the development of the criminological science on the subject of road safety, it will help to develop new strategies in criminal politics under a scientific approach, which had never been applied before, creating a frame of multidisciplinary study that will help to the reduction of the road accident rate. It will also help to create new prevention lines, and help the road victims.	If applies, describe to what extend the proposed initiative will lead to new approaches and practices in road safety. Max: 100 words
Issues that are addressed with the initiative	The main problem that tries to be settled by the initiative of the Observatory, is the creation of scientific material (that is almost void) to be able to apply to the road safety and that help to the reduction of the road accident rate, with the practical application of the created material.	Describe the issues identified leading to implement the road safety activities. Max: 100 words
Activities developed	<p>-Creation of 'groups of work' formed by criminologists specialists in Road Safety for the research and development of the road Criminology .</p> <p>-Based on the results obtained in the 'groups of work', courses, workshops, congresses will be realized for the publication and application of the abstracted and investigated knowledge.</p> <p>-With regard to the road victims, inside the Observatory, the Unit UAVIS (Unit of Attention to Road Victims) will be developed for the investigation and treatment of the victims, based on the road victimology.</p>	Describe all the activities involved in the initiative, and where appropriate indicate the arrangement for each partner's participation. Max: 600 words

Genesis	<p>-The prevention of the road catastrophes and the comission of crimes against the road safety across the study, investigation and application of the Criminology to road in favour of the road safety.</p> <p>-To give orientation, help and assistance to the victims of road catastrophes by means of guided projects of intervention and assistance to reduce the negative effects of the road accident rate.</p> <p>-Creation and development of the counterfoil of the 'road insecurity' so to be able to implement, with efficacy, measurements of road prevention .</p>	<p>Describe the reasons why you have chosen this initiative.</p> <p>Max: 100 words</p>
Transferability and multiplier effect	<p>The multiplier effect is enormous, since any organization, public entity, etc. can apply the knowledge deduced from the Observatory, to which, before publishing them, will be put into practice, so we will be able to meet if the targets are the correct ones and possible error correcting, creting projects and/or initiatives for a society aware of the reduction of the road accident rates.</p>	<p>Describe to what extent the proposed initiative will allow the transfer, dissemination or application of the results, experience and knowledge gained as well as the good practices on a larger scale.</p> <p>Max: 200 words</p>
Promotion and dissemination	<p>All the results and initiatives will be published and carried out through the social networking and available platforms.</p>	<p>Describe whereby the initiative will be publicised (publications, events, websites, CD-ROM, etc.).</p> <p>Max: 100 words</p>
Continuity	<p>The work of the activities developed by the Observatory have a continuous character, without ending in the current year.</p>	<p>Indicate if there is a plan to continue some activities in the coming years.</p>

		Max: 100 words
Evaluation of the activities	<p>The evaluation has to be continuous to establish an ideal observation of the conducts of the rolled traffic. It will be evaluated according to the type of action on the one hand, the reports that are extracted from the groups of work have to be refuted based on the criminological science by expert personnel in the matter and later in its application of the preventive measurements that have been exhibited. An initial and final evaluation will be done to verify its efficacy and future protection towards more implied groups.</p> <ul style="list-style-type: none"> - Decrease of the number of road catastrophe - Increase of the visibility of the actions of the observatory. - Indicators that measure the participation and to benefit from the carried out actions. - Proper indicator of the observatory established in its counterfoil of the road insecurity. 	<p>If relevant, describe the proposed evaluation method and the performance indicators in relation to the expected objectives.</p> <p>Max: 100 words</p>
Other important aspect that you want to underline	<p>The most relevant and interesting aspect of the project is that it is pioneering, at a national, European and world level; no organization has been in charge of investigating, creating, developing and applying the criminological science to the Road Safety, that is why we want to emphasize this initiative that has a multidisciplinary character, in that it can contribute in a very important way to the reduction of the road accident rate where the strategies come from the exposed scientific study, are applied.</p>	<p>Any information that could help the jury to evaluate your initiative.</p> <p>Max: 100 words</p>
