"Moving People for an Easier Life"

We are TO.TEM

Torino Technologies and Electric Mobility

Our first product is LYNX
an outstanding award
winning electric scooter

We are now back with
COBRA the safest e-bike
ever designed

The problem

Urban cycling is sustainable, cool and healthy but:

- 2.035 fatalities per year
- Biking represent 9% of overall road fatalities
- EU targets 50% reduction by 2030

TO.TEM Solution

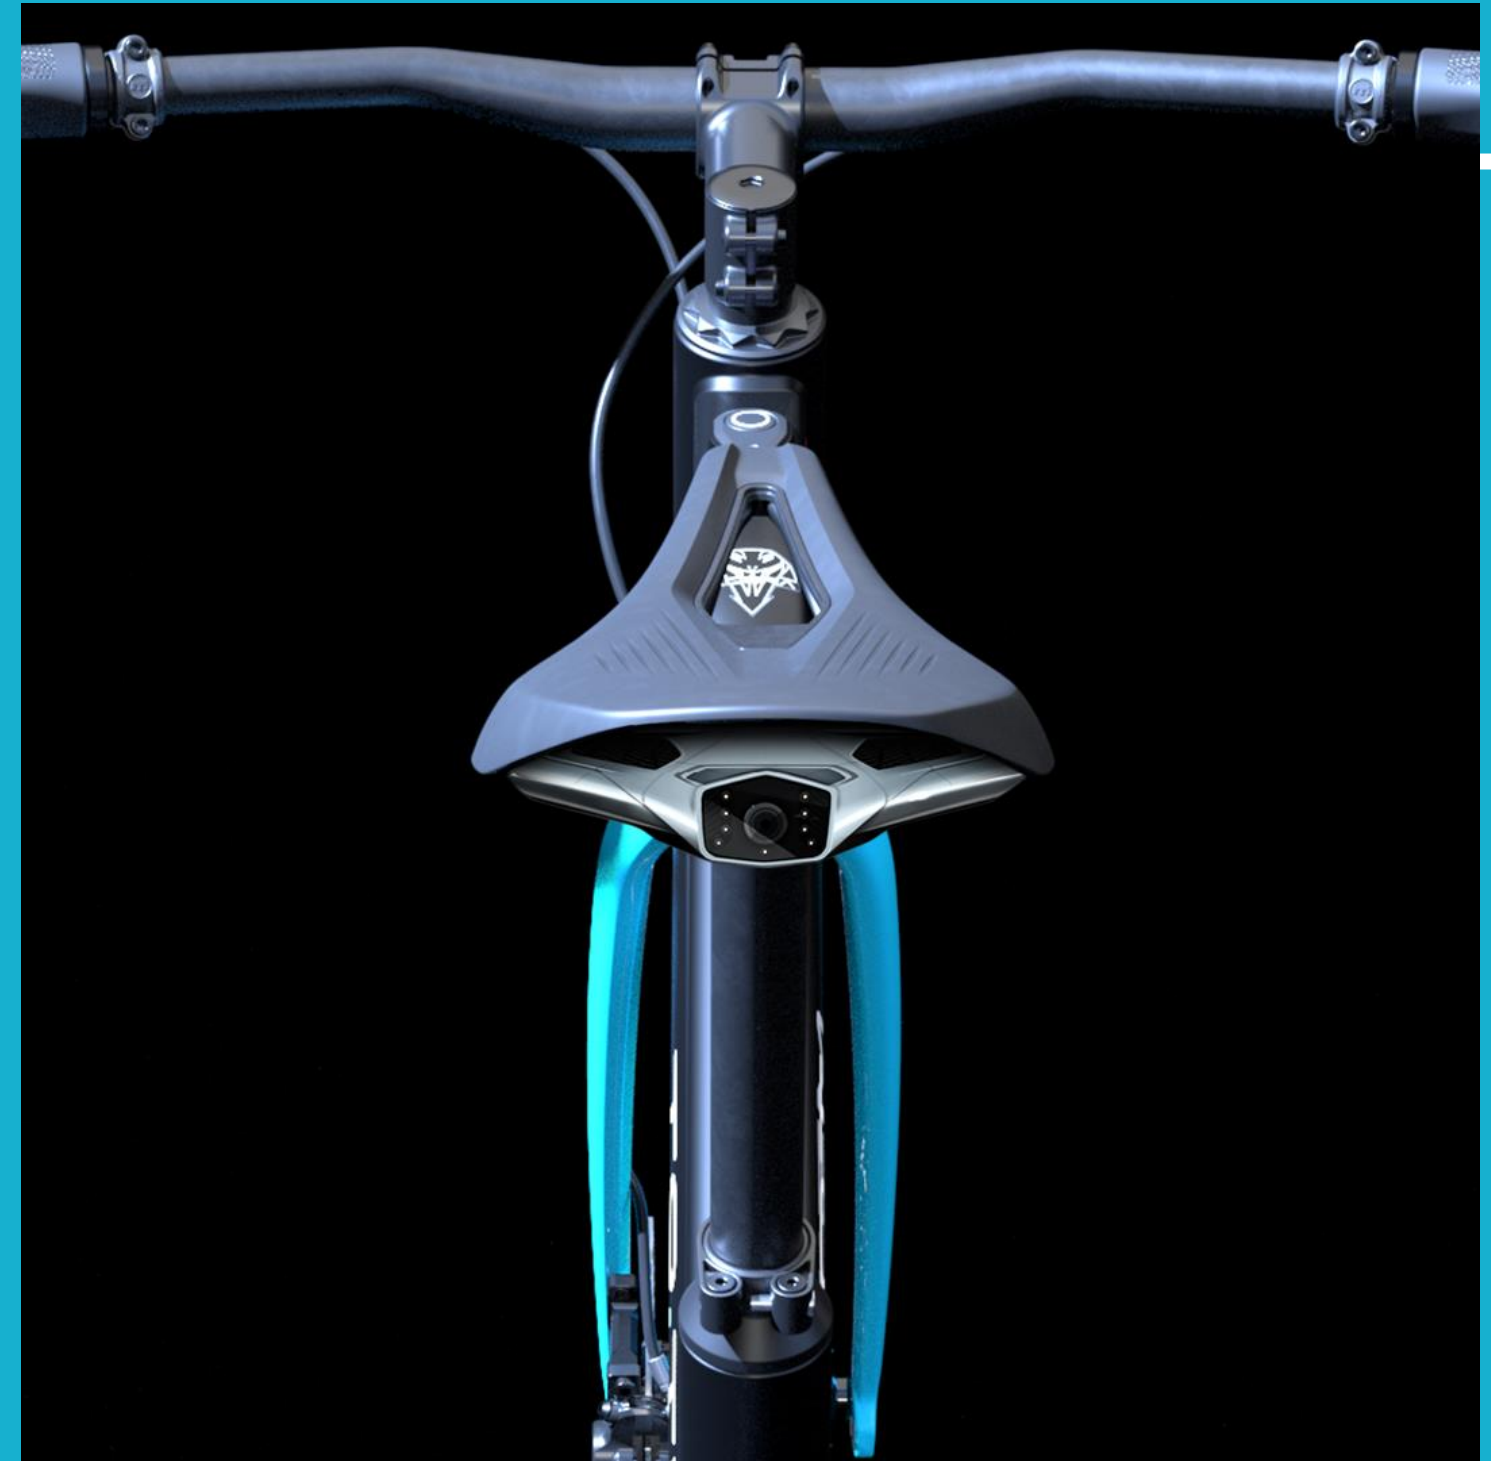

Our Commuter suite is the solution to safety issues for **sustainable biking**

Our eBike SW includes **electronic mirror, collision alert and navigation system**

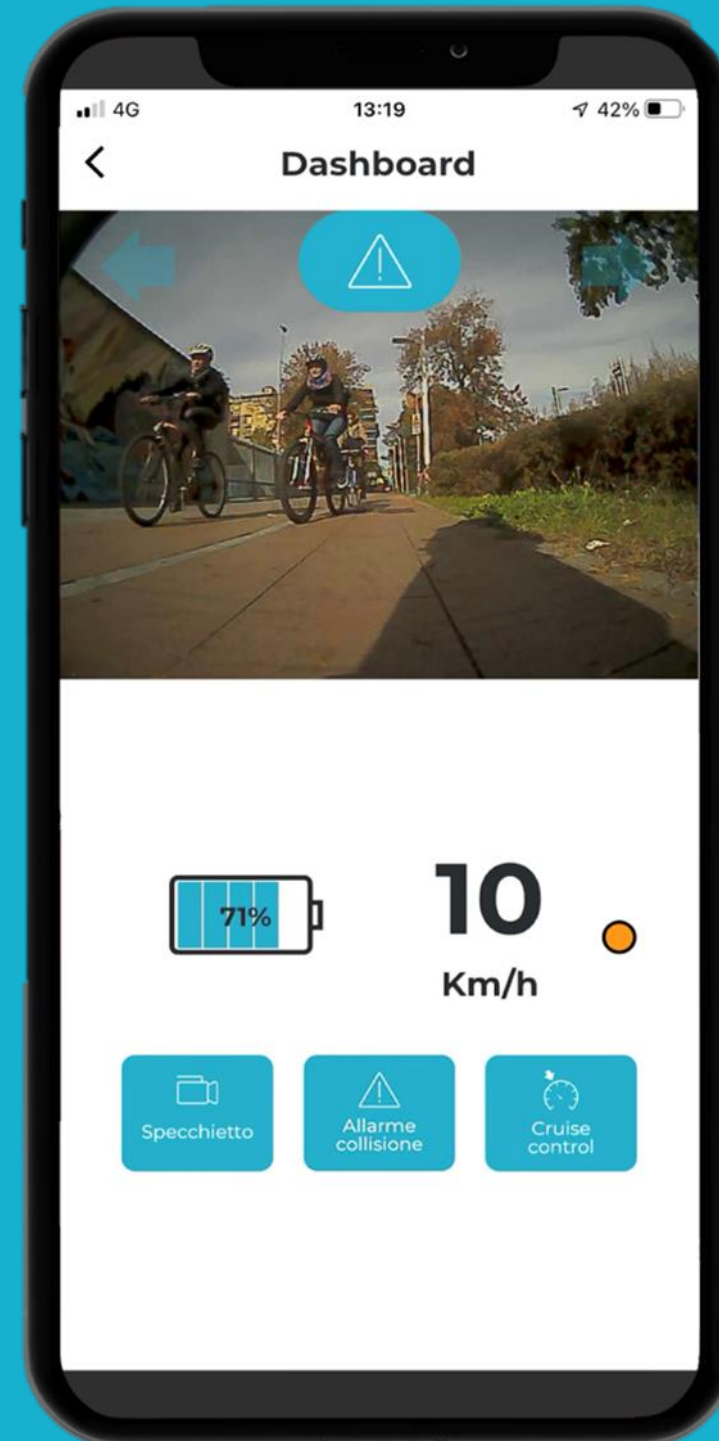

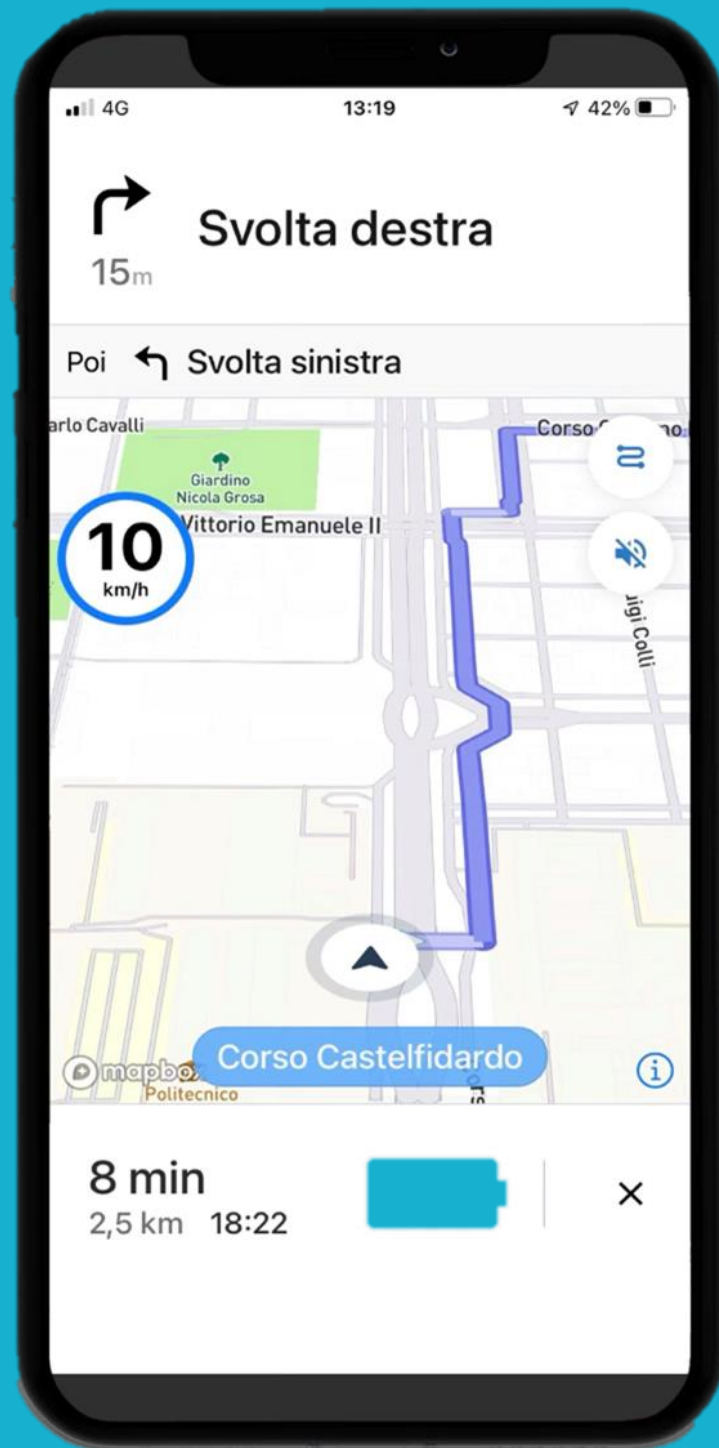

Directly from the automotive world our “Collision Alert”

Rear placed camera
that leverages AI &
Computer Vision to
decrease up to 60%
injuries

Engineering & Innovation for commuter safety

The rear view camera works as **electronic mirror** to avoid cyclist to turn and lose attention

Artificial Intelligence works in background tracking vehicles, bikes and people to avoid collisions

The **navigation system** is optimized for cycle lanes avoiding dangerous roads

We are TO.TEM

Torino Technologies and Electric Mobility

We believe in a **sustainable** future where people can go biking and **feel safe** everywhere

This is why our transformative purpose is:
“**Moving People For an Easier Life**”

THANKS!
