

GET THE SHOW ON THE ROAD

In response to what we experienced on our domestic controlled-access highways, we launched a new video series in 2023 called GET THE SHOW ON THE ROAD!, which will continue in 2024. Littering, wreck derby, inattention, impatience, rest stop theft... All about transport culture with **Péter Janklovics, Péter Elek, Attila Csenki, and Ádám Török.**

ONBOARD CAMERAS HAVE BEEN INSTALLED IN OUR CARS

On a pilot basis, we have installed onboard cameras in some of our cars. So we've fitted some of our road patrol and foreman vehicles and truck mounted attenuators (TMA) with driving recorders at the front and rear—to protect everyone.

Since 1 September 2022

- **Our colleagues have been involved in 43 accidents**
- **9 of our colleagues were hospitalised**
- **More than 40 of our vehicles were damaged or disabled**

Because of the high number of injuries and property damage, we decided to install cameras to protect our colleagues and vehicles.

We expect this to improve road safety and morals. We hope the fact that we make recordings from our cars will bring increased safety for our staff. This way we protect our colleagues' life and safety and the integrity of our vehicles.

MINIPOLIS

We have joined our forces with the National Accident Prevention Committee and HUMDA Hungarian Mobility Development Agency Zrt. to promote unique child-centred educational experiences and road safety.

This exciting collaboration aims to teach children the basics of safe driving in a playful environment from a young age, helping to ensure that future generations will be responsible road users. Safe roads are the basis for safe transport. The MKIF Stand is a fun and educational adventure for 3-12-year-olds, where children can not only learn about the work of our Engineering Agencies, road maintenance and closures but also become responsible and aware young road users thanks to the road safety quiz.

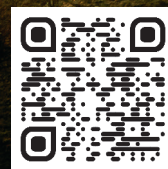

BE SAFE VLOG

Our BE SAFE video series focuses on the most critical issues of safe motorway driving.

The expert of our regular series is driving instructor Zoltán Tóth.

The topics covered in the series to date have included: following distance, keeping to the right, accidents, acceleration and deceleration lanes, seat belt use, seat adjustment, child seat use, poor visibility and road conditions.

Not only the safety of our employees but also the safety of road users is of paramount importance to our company, so in this series, we draw your attention to situations that can prevent many accidents.

WE ARE ON TRACK.
TOGETHER, WITH YOU.
